SPMS - starting out with about 130 students, it has been a relatively smooth start to the year. Everyone has complimented students on their behavior and willingness to work on school and classroom culture. This is everyone’s education so they have to work as a team in the classroom to get the most out of each day with instructional and engagement strategies. All of the activities have kicked off and we have about half of the students involved in athletic competition of some kind. The average school may have about 35% of student participation. We will start MAP testing after Labor Day, that will give a marker for growth in the spring. Hopefully, students will take it seriously and do their best on the test. We have some new classes and some new teachers.

Cristina Burk - Special Education and Interventionist
Madeline Paugh - ELA
Corree Rivas - Social Studies

SPHS - Starting out with about 130 students, a smooth start to the school year. Same working on school and classroom culture for the good of all students. All of the activities have kicked off and we have about half of the students involved in athletic competition of some kind. We will start MAP testing after Labor Day, that will give a marker for growth in the spring. Hopefully, students will take it seriously and do their best on the test. We had some students work on the Alma Riverwalk over the summer and they did a fantastic job on the trail. Go visit!!

New Teacher at both the middle and high schools:
Lennie Doyle - Math
Jon Thompson - Band/STEAM
Ali Springer - Art
